

# NETWORK HIGHWAYS: A ROAD WITHOUT A MAP

By: Network Instruments

How do you prepare for a road trip? Study a map. Set the GPS. Have a smart phone handy in case you get lost. Yet, according to the Seventh Annual State of the Network Global Study, many IT teams lack the visibility and understanding to avoid potential pitfalls. Hazards can include managing UC, handling rapid bandwidth growth, implementing SDN, and ensuring application performance. When you know what lies ahead, it becomes easier to chart a course to success.
